

# Certificate

## OF ACHIEVEMENT

This Certificate is Proudly Presented to

**YOGA SULISTIYO WIDODO**

For Completion of the **berijalan Technocenter**  
**BOOTCAMP BATCH 15**

from

**September 25, 2025 - December 19, 2025**

at **berijalan Technocenter,**  
**Yogyakarta**

**KATARINA WULANDARI**  
HUMAN CAPITAL DIVISION HEAD

**HENDRY LIANG**  
INFORMATION TECHNOLOGY  
DIVISION HEAD

# DAFTAR NILAI

**Name** : Yoga Sulistiyo Widodo

**Internship Period** : September 25, 2025 - December 19, 2025

**Internship Position** : Fullstack

**Project Name** : IDMS

**Study Program** : Teknologi Informasi

**Faculty** : Teknik

**University** : Universitas Negeri Yogyakarta

No	Specialization	Learning Outcome	Score (0-100)
1	Basic System Analyst	Participants will be able to think critically, solve complex problems, and apply creative solutions to system challenges. They will confidently use data-driven analysis to make informed decisions, improving system efficiency and performance. These skills will enable them to design, optimize, and enhance systems with innovative and effective solutions.	87
2	PLSQL	Participants had knowledge and skills in designing PL/SQL for interacting with databases and applications. It starts with an introduction to basic queries and progresses to PL/SQL itself, then introduced to PL/SQL variables, control structures, cursors, triggers, PL/SQL exceptions, procedures and functions, as well as tuning using indexing.	86
3	Fullstack Js (Mobile & Web )	At the end of the training, participants can understand the workflow and basic concepts of Framework React for mobile and web development, as well as the creation of backend logic (API and server), so that participants are able to create web and mobile applications according to figma designs in a logically and structured manner.	85
4	Springboot	At the end of the training, participants will implementing REST FULL API in Java Spring Boot using Kotlin by implementing JPA library, HttpClient, authentication interceptor and min.io OSS implementation	89
